#### TL3016, TL3016Y **ULTRA-FAST LOW-POWER** PRECISION COMPARATORS SLCS130D - MARCH 1997 - REVISED MARCH 2000

- Ultrafast Operation . . . 7.6 ns (Typ)
- Low Positive Supply Current 10.6 mA (Typ)
- **Operates From a Single 5-V Supply or From** a Split ±5-V Supply
- **Complementary Outputs**
- Low Offset Voltage
- No Minimum Slew Rate Requirement
- **Output Latch Capability**
- **Functional Replacement to the LT1016**

#### description

The TL3016 is an ultrafast comparator designed to interface directly to TTL logic while operating from either a single 5-V power supply or dual  $\pm$ 5-V supplies. It features extremely tight offset voltage and high gain for precision applications. It has complementary outputs that can be latched using the LATCH ENABLE terminal. Figure 1 shows the positive supply current of this comparator. The TL3016 only requires 10.6 mA (typical) to achieve a propagation delay of 7.6 ns.

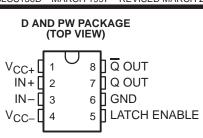

The TL3016 is a pin-for-pin functional replacement for the LT1016 comparator, offering higher speed operation but consuming half the power.

		PACKAG	ED DEVICES			
TA		SMALL OUTLINE <sup>†</sup> (D)	TSSOP (PW)	CHIP FORM <sup>‡</sup> (Y)		
0°C to 7	O°C	TL3016CD	TL3016CPWLE	TL3016Y		
-40°C to	–40°C to 85°C T		TL3016IPWLE	—		

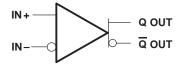

**AVAILABLE OPTIONS** 

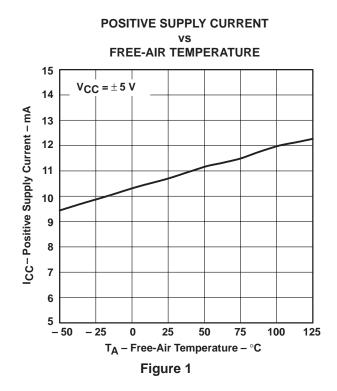

<sup>†</sup> The PW packages are available left-ended taped and reeled only.

<sup>‡</sup>Chip forms are tested at  $T_A = 25^{\circ}C$  only.

#### TL3016, TL3016Y ULTRA-FAST LOW-POWER PRECISION COMPARATORS SLCS130D – MARCH 1997 – REVISED MARCH 2000

TL3016Y chip information

This chip displays characteristics similar to the TL3016C. Thermal compression or ultrasonic bonding may be used on the doped-aluminum bonding pads. Chips may be mounted with conductive epoxy or a gold-silicon preform.

COMPONENT COUNT					
Bipolars	53				
MOSFETs	49				
Resistors	46				
Capacitors	14				

## TL3016, TL3016Y **ULTRA-FAST LOW-POWER** PRECISION COMPARATORS

SLCS130D - MARCH 1997 - REVISED MARCH 2000

#### absolute maximum ratings over operating free-air temperature range (unless otherwise noted)<sup>†</sup>

Supply voltage, $V_{DD}$ (see Note 1) Differential input voltage, $V_{ID}$ (see Note 2) Input voltage range, $V_{I}$ Input voltage, $V_{I}$ (LATCH ENABLE) Output current, $I_{O}$ Continuous total power dissipation Operating free-air temperature range, $T_{A}$	
Storage temperature range, T <sub>stg</sub>	– 65°C to 150°C
Lead temperature 1,6 mm (1/16 inch) from case for 10 seconds	260°C

† Stresses beyond those listed under "absolute maximum ratings" may cause permanent damage to the device. These are stress ratings only, and functional operation of the device at these or any other conditions beyond those indicated under "recommended operating conditions" is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability.

NOTES: 1. All voltage values, except differential voltages, are with respect to network ground.

2. Differential voltages are at IN+ with respect to IN-.

#### **DISSIPATION RATING TABLE**

PACKAGE	T <sub>A</sub> ≤ 25°C POWER RATING	DERATING FACTOR ABOVE T <sub>A</sub> = 25°C	T <sub>A</sub> = 70°C POWER RATING

<sup>†</sup> Full range for the TL3016C is  $T_A = 0^{\circ}$ C to 70°C. Full range for the TL3016I is  $T_A = -40^{\circ}$ C to 85°C. <sup>‡</sup> All typical values are measures with  $T_A = 25^{\circ}$ C.

## TL3016, TL3016Y **ULTRA-FAST LOW-POWER** PRECISION COMPARATORS

SLCS130D - MARCH 1997 - REVISED MARCH 2000

### switching characteristics, $V_{DD}$ = ±5 V, $V_{LE}$ = 0 (unless otherwise noted)

	PARAMETER	TEAT OOL	TEST CONDITIONS <sup>†</sup>		FL3016C	;	TL3016I			UNIT
	PARAMETER	TEST COM			TYP	MAX	MIN	TYP	MAX	UNIT
t u Douroution data direct		$\Delta V_{I} = 100 \text{ mV},$	$T_A = 25^{\circ}C$		7.8	10		7.8	10	
		$V_{OD} = 5 \text{ mV}$	T <sub>A</sub> = full range		7.8	11.2		7.8	12.2	
<sup>t</sup> pd1	Propagation delay time‡	$\Delta V_{I} = 100 \text{ mV},$	T <sub>A</sub> = 25°C		7.6	10	_	7.6	10	ns
			$T_A = $ full range		7.6	11.2		7.6	12.2	
t <sub>sk(p)</sub>	Pulse skew ( t <sub>pd+</sub> – t <sub>pd</sub> _ )	$\Delta V_I = 100 \text{ mV},$ T <sub>A</sub> = 25°C	V <sub>OD</sub> = 5 mV,		0.5			0.5		ns
t <sub>su</sub>	Setup time, LATCH ENABLE				2.5			2.5		ns

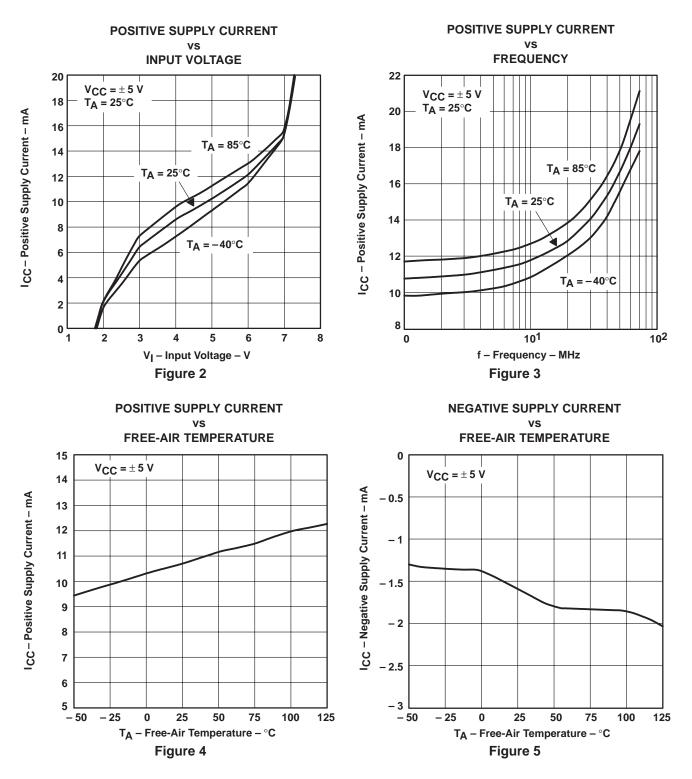

Full range for the TL3016C is 0°C to 70°C. Full range for the TL3016I is -40°C to 85°C.  $t_{pd1}$  cannot be measured in automatic handling equipment with low values of overdrive. The TL3016 is 100% tested with a 1-V step and 500-mV overdrive at T<sub>A</sub> = 25°C only. Correlation tests have shown that  $t_{pd1}$  limits given can be ensured with this test, if additional dc tests are performed to ensure that all internal bias conditions are correct. For low overdrive conditions, V<sub>OS</sub> is added to the overdrive.

<sup>(1)</sup> **Status:** For more details on status, see our product life cycle.

<sup>(2)</sup> Material type: When designated, preproduction parts are prototypes/experimental devices, and are not yet approved or released for full production. Testing and final process, including without limitation quality assurance, reliability performance testing, and/or process qualification, may not yet be complete, and this item is subject to further changes or possible discontinuation. If available for ordering, purchases will be subject to an additional waiver at checkout, and are intended for early internal evaluation purposes only. These items are sold without warranties of any kind.

<sup>(3)</sup> RoHS values: Yes, No, RoHS Exempt. See the TI RoHS Statement for additional information and value definition.

<sup>(4)</sup> Lead finish/Ball material: Parts may have multiple material finish options. Finish options are separated by a vertical ruled line. Lead finish/Ball material values may wrap to two lines if the finish value exceeds the maximum column width.

(5) MSL rating/Peak reflow: The moisture sensitivity level ratings and peak solder (reflow) temperatures. In the event that a part has multiple moisture sensitivity ratings, only the lowest level per JEDEC standards is shown. Refer to the shipping label for the actual reflow temperature that will be used to mount the part to the printed circuit board.

<sup>(6)</sup> Part marking: There may be an additional marking, which relates to the logo, the lot trace code information, or the environmental category of the part.

Multiple part markings will be inside parentheses. Only one part marking contained in parentheses and separated by a "~" will appear on a part. If a line is indented then it is a continuation of the previous line and the two combined represent the entire part marking for that device.
