```
*************************************************************************
*
* Model Usage Notes:
* A. Features modelled
*    1. Average loop implementaion of constant off time.
*    2. Only VIN, SW and FB pins are modelled.
*    3. Model only supports continuous conduction mode.
*
* B. Features not modelled
*    1. Device does not support PFM cases.
*    2. Temperature dependent characteristics.
*    3. Operating Quiescent Current.
*    4. Shutdown Current.
*
* C. Application Notes
*    1. Following parameter is added in the model
*       a. The parameter "L" has been used to pass the inductor value with in the model.
*    2. Ground Pins have been tied to 0V internally and hence model does not support Inverting
*       topologies.
